

Course Outline

This course is designed for leaders of Emergency Control Organisations (ECO's) in factories, manufacturing facilities, warehouses, offices or other workplaces. This includes Chief Wardens, Deputy Chief Wardens and Communication Officers.

Participants are assisted in understanding their position within the emergency response structure, and the importance of communication, decision making and reporting.

Workplace emergencies are discussed, along with the appropriate considerations and responses. Site communications and procedures for evacuation of personnel to nominated muster points are discussed and explained.

As part of this course, participants will also participate in a tailored "table-top" discussion exercise, specific to their site.

Course Details

- Number of Participants: 10
- Course Duration: 4 hours
- Location: This course is available onsite.
